102360376   **The account that allows Radimetrics to log in to PS360, shows in the RadPortal multiple times.**

The Portal is displaying extra logging activity of the web service API (v3.0.1). This was added to the user activities logging and it will remain in the activity list for up to 3 hours unless user session is logged off.

In the prior version of PS360, we did not display this logon and activity of the web services.

Radimetrics is reviewing their method of authentication to include a log out after data is sent.
